

April 4, 2018

We are aware the Texas Asbestos License has expired. Although we submitted our renewal in timely manner, the state has informed us that they are very short-handed and the certificate will be 30-60 days late in coming out. They tell us that if we submitted our renewal before the expiration date and payment was received then there is no problem with the renewal and we are still legally providing asbestos analysis.

If we can provide you with any further information to help with this issue please feel free in contacting us. 281-648-9918
